The month, the ‘Take Charge of Your Health’ today page focuses on organ donation and the lives of the recipients. Chumbler's father, Michael Chumbler, re-}

The conversations that folks have in the community about organ donation are shamed by myths, superstition and even urban legend. We're all here trying to figure out how we can get this guy waking up in a full bed of dry ice with his kidney.

All of these statistics add up to the fact that organ donation is a win-win for everyone. If the organ is used or if it is transplanted and process can help overcome some of the obstacles that delay donations. For Michael Chumbler, exchanged ideas on this topic.

Here I am, Michael Chumbler's son, standing here talking about organ donation. My dad passed away in 2008. I am here today to tell you how important organ donation is.

As one of 58 federally designated not-for-profit organ procurement organizations (OPOs), CORE works closely with donor hospitals and funeral home directors as well as other health care professionals to deliver the gift of life by coordinating the surgical recovery of organs, tissues and corneas for transplantation.

The Center for Organ Recovery & Education (CORE) is a stand-alone, non-profit organization that facilitates organ and tissue donation. Its mission is to facilitate a national system that connects organ donors with people in need in an ethical, efficient, equitable manner.

We'd like to have people feel more comfortable discussing the topic of organ donation. The conversations that folks have in the community about organ donation are shamed by myths, superstition and even urban legend.
